PLATING TECHNOLOGY

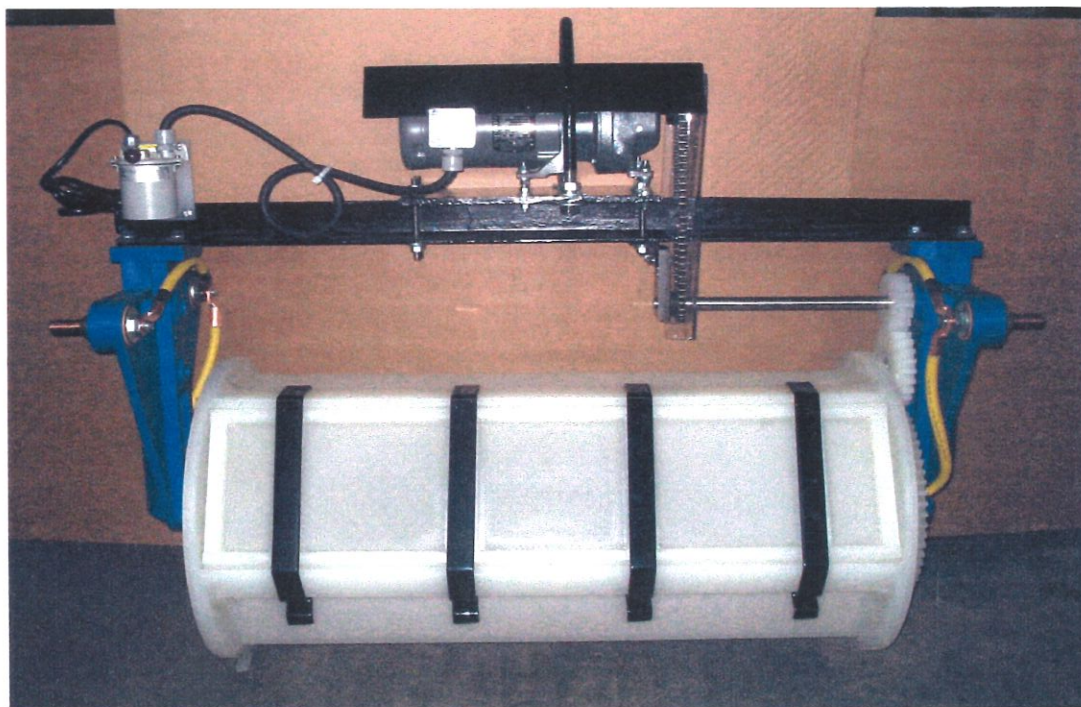

MANUFACTURERS OF QUALITY EQUIPMENT, PARTS,
& SERVICE FOR THE METAL FINISHING INDUSTRY

CORE'S PRODUCTION PLATING BARRELS

CORE Manufactures a Complete Line of Production Plating Barrels – We Offer Both Tank Driven and Self Contained Motorized Units for the Plating and Wet Processing Industry – **CORE'S "TRUNI-BODY"** Cylinder Design Delivers a Virtually "Trap-Free" Construction without Sacrificing Any Structural Integrity. Combine this with Our Improved Polyglass Hanger Arms, and the Result is a Tough, Efficient, Barrel Assembly for Today's Demanding Market.

& SERVICE FOR THE METAL FINISHING INDUSTRY

CORE'S PLATING CYLINDERS **SECOND TO NONE!**

CORE's Unique Cylinder Design, Both Rugged and Chemical Efficient, is Your Best Start to a *Fine Finish!* While the Method(s) of Cylinder Construction has Remained Stagnant Over the Years, CORE Has "Raised the Bar" in Cylinder Design/Construction to Address the Ongoing Dragout and Rinsing Problems in the Industry. In pursuit of this Design, CORE Has Developed a Method of Construction That Not Only Addressed the Dragout and Rinsing Problem, But Enhanced the Cylinder's Overall Structural Integrity. Minimizing Hand Welds to Only Two Locations, This Design Has Been Tested & Proven...Not Only in "Common" Plating Applications, But in Harsh Environments Such as Electroless Nickel and Aggressive Permanganate Processes. CORE's Cylinder, Even Pushed Beyond It's "Normal" Operating Limits, Stands Up Strong ... *Load, After Load...After Load!!*

In Addition to the Standard Hexagonal Cylinder, CORE Offers This Unique Construction in an Octagonal Design. CORE's Octagonal Design Yields an Approximate 20% Increase of the Cylinder's Internal Load Capacity, Which is Achieved in the Same Working Envelope That Currently Exists on the Plating Line. Both the Hexagonal and Octagonal Deliver Optimal Tumbling Action Without the Use of Troublesome Internal Breakers Bars Required in the Round Cylinder Configuration.

**WHETHER THE ISSUE IS INTERNAL VOLUME, TUMBLING, DRAGOUT/RINSING,
OR PLAIN OLD CYLINDER DURABILITY... *CORE'S GOT YOU COVERED!***

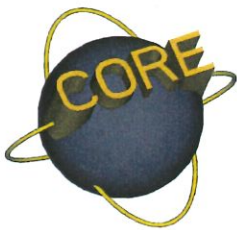

WE LOOK FORWARD TO HEARING FROM YOU!!

*Core Plating Technology is Committed to Providing Complete Customer Satisfaction...
