

DIGITAL TIMER - AC POWER

A timer designed from the ground up for corrosive, acid, wet environments. Simple to use as a kitchen timer.

Counts down from the time you set, and when the time elapses, a LOUD 103dB warbling buzzer sounds with flashing beacon LED.

Push the illuminated green front button to silence the buzzer, which automatically resets the time for the next cycle. Easy to set different times on the fly with the blue buttons.

- Waterproof. Suitable for wash down duty. Lithium battery included typically lasts for years. (2-3 years for rather busy service conditions)
- Backlit display with 18mm digits allows great visibility even in dark areas.
- Two timing ranges: 100 minutes, or 100
- Many other modes are selectable in the field jumpers located inside the box. (repeating, off, guard-duty, count up, etc)
- Piggyback cord allows control of devices like by the on-board 10A relay.
- Strobing beacon LED included.
- After the time has elapsed, the display counts up until the alarm is acknowledged.
- Compact box is only 4x4x2 inches.

We will gladly customize it with different color LEDs,, different buzzer tones, auxiliary outputs, power supplies, custom programs. Call us with your needs!

Ideal for repetitive timing in plating, laboratories, poultry farms, chemical processes, food industry, and more!
