

INDUSTRIAL TANKS

OVER 60 YEARS OF MANUFACTURING EXPERIENCE WITH 8 NATIONAL MANUFACTURING LOCATIONS.

THE ENGINEERED DIFFERENCE IN TANKS

When you weigh it all, Snyder has the most advantages in bulk storage, processing and transportation tanks:

Widest selection of sizes up to 20,000 gallons

Snyder offers a full range of product designs, including closed or open-top vertical tanks in flat or cone-bottom styles, horizontal, containment and a complete line of UN/DOT-approved intermediate bulk containers (IBCs).

55 years of manufacturing experience

Snyder's six major manufacturing locations, including the world's largest rotational molding facility, mold a variety of polyethylene materials including FDA and NSF 61 listed linear high-density (HDLPE) and cross-linked high-density (XLPE) resins.

Superior quality systems ensure safety

Snyder's commitment to quality starts with an uncompromising analysis of incoming raw materials. It continues throughout the completion of finished product assembly with the application of Statistical Process Control (SPC). Moreover, Snyder executes a final quality check with its industry-leading inspection program on products before shipment.

Proven tank design and engineering expertise

Snyder's large engineering staff is responsible for a multitude of polyethylene tank processes and design patents. Customized consulting services are available to ensure the right tank design and accessories. Resins are matched with a specific customer's application.

- Industrial (ASTM D1998-15) and Commercial design standards available.
- Material options for a diverse range of application requirements:
 - High-density linear polyethylene (HDLPE) black and natural white color - Complies with FDA Regulation 177.1520 and NSF standard 61.
 - Cross-linked, high-density polyethylene (XLPE) black and natural white color.
 - Opaque white UV block out resin #880059 up to 12,500 gallons or 1" insulation/mastic coating up to 18,800 gallons for outdoor sodium hypochlorite application.
 - Sulfuric acid HDLPE resin #880046 up to 18,800 gallons.
- Available with cable restraint systems that meet 150 mph wind load and IBC seismic requirements.
- Specific gravity ratings are based on the industry's most severe calculation.
- Standard specific gravity choices are 1.5 and 1.9, other ratings are available upon request.
- All materials are UV stabilized for long- term outdoor service.

Snyder's integrally molded-in bottom drain fitting, SUMO, provides maximum drainage for vertical bulk storage tanks in the 2000 - 12,500 Gallon size and is available as an option in diameter sizes up to 6" depending on tank size.

NARROW VERTICAL STORAGE TANKS

Narrow Vertical Storage Tanks feature:

- 18" manways for easy clean-out.
- · Narrow 29" width designed to fit through 30" doorways.
- · Fitting inset to protect against impact
- Water or DEF applications only.

USED OIL COLLECTION TANKS

Enjoy enhanced operational and environmental safety with Snyder's Used Oil Collection Tanks.

- Unique tank-in-a-tank containment system provides 120% containment of tanks contents.
- Primary tank is black, Secondary containment tank is safety yellow.
- Complies with the latest EPA standards for waste oil storage containers CFR 40- 279.22.
- 2" top draw quick-connect drain coupling
- 14" or 18" hinged lockable manway for indoor or outdoor security.
- · Debris strainer basket.
- · Optional Tank Level Indicator.
- Maintenance free, won't rust, chip or dent.
- · Vented, weather resistant design.
- Made from 100% recyclable polyethylene
- 120, 150, 275, 360, 500 and 1000 gallon sizes available.

14" or 18" hinged lockable manway for indoor or outdoor security

Forklift channels on 275, 360 & 500 gallon sizes.

2" top draw quick connect drain coupling with internal suction pipe.

Optional tank level indicator.

DOUBLE-WALL TANKS

Smaller dual-containment tanks provide added safety and environmental protection in more confined or remote storage locations. The advanced double-wall tank design is enclosed to prohibit foreign matter from entering the secondary containment tank, and a unique

octagonal shape provides optimal spacing and sealing surface for the industry's most reliable transition fitting.

Rib Reinforced Flat Top Design provides ample surface space for chemical feed pump mounting.

Primary Tank is available in both closed and open-top tank designs.

Top Draw-Tube Assembly enables material contents to be safely dispensed from the top of the tank. (optional)

Two Tanks within one design provide double-wall protection.

Available in XLPE and HDLPE resin packages.

Transition Fitting allows side safe installation and long-term sealing power through both walls of your dual containment tank. (optional)

SIISNYDER industries, inc.

WARNING

Better

 2" Vent provides vacuum relief for interior tank. (optional)

Large Flat Surface Area provides ample space for a variety of fitting sizes and styles.

Enclosed Double-Wall Tank prevents foreign matter from entering outer containment tank.

Narrow Diameter provides location versatility in that it can fit through most any doorway.

Secondary Containment Tank provides 120% of inner tank's capacity. Complies with CFR-264.193.

All Other Snyder Industrial Product Fittings and accessories are available wherever applicable.

Molded-in Forklift Channels available on DCT's sizes 275 gallon through 500 gallon.

DOUBLE-WALL TANKS

CAPTOR CONTAINMENT SYSTEMS

Snyder's revolutionary Captor Containment System is designed to alleviate the ever-changing environmental and safety concerns regarding bulk chemical storage and containment for the 21st century. Captor's unique tank-in-a-tank design enables users and specifiers to incorporate advanced performance and safety features on a bulk-handling system, which provides total containment protection. Captor's double-wall construction is completely enclosed so that external matter, such as dust, rain and snow is prevented from collecting in the outer containment tank. Besides deliver-

ing unparalleled performance benefits, Captor Containment Systems also contribute to your company's bottom line by significantly reducing installation and procurement cost. Captors are shipped fully assembled on either a standard or wide-load flatbed trailer, which reduces comparable costs by an average of 35 percent.

Flanged Outlets and other fitting designs can be securely fastened and sealed to many of the large flat areas located on the top section of the tank. (optional)

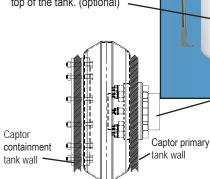

U-vent Assemblies are available in a variety of sizes to relieve stress from vacuum or pressure.

Top Lifting Eyelets make tank unloading and site handling easier and safer.

Fill and/or Draw Pipe
Assemblies can be installed to facilitate different material loading or unloading requirements. (optional)

U.F.O. (Unified Fitting Outlet) is uniquely designed to

mechanically seal fitting outlet through both the inner and outer tank walls. Material unloading is easier and more cost effective than pumping contents from the top of the tank. (optional)

Sectional Side View

 OSHA-Approved Ladders are available with and without cages in fiberglass and galvanized steel construction.

Bolted and Threaded Manways are available in sizes up to 24". Standard size is an 18" threaded manway.

Molded-In Tie-Down Lugs interface with optional cable restraint system to meet seismic IBC code and 150 mph wind requirements.

Double-Wall Tank Construction encloses and interlocks outer and inner tank to prevent rain, snow, and debris from entering outer containment tank.

Outer Containment Tank provides 115-120% of inner tanks capacity for added safety factor. Complies with 40 CFR-264.193.

CHEMICAL FEED STATIONS

Complete and ready to use Chemical Feed Stations allow you to handle small amounts of liquids and other chemicals in a safer and more efficient manner than drums. The Chemical Feed Stations can be located close to your customer's use point, thereby eliminating the need for them to move and handle heavy drums and tote bins of hazardous materials, while at the same time eliminating the handling costs and inconvenient disposal of drums and one-way tote bins.

Tanks available in both HDLPE and XLPE.

Chemical Injection Systems for the Oil & Gas and Water Treatment Industries!

- Corrosion Resistant Polyethylene Stands won't rust like steel stands which translates to reduced maintenance.
- Containment Basins provide 110% containment of tank.
- Containment Basins have a closed top to keep out debris and to keep wildlife from getting into the containment.
- Ideal for chemical injection or chemical feed systems that require a lower profile tank on a stand.

.

OPEN TOP TANKS & CONTAINMENTS

Vertical open-top containment tank designs incorporate an inward top flange lip, which provides optimum container structural integrity.

Cylindrical open-top tanks can be utilized as primary process or mix tanks or for secondary containment of an inner tank. All open-top tanks are available in high-density linear polyethylene (HDLPE) – black and natural white color, which complies with FDA regulation 177.1520 and NSF standard 61, as well as cross-linked, high-density polyethylene (XLPE) – black and natural white color.

HORIZONTAL TANKS

- Skids, saddles, cradles and side mounts for a wide range of stationary storage or mobile liquid transport applications.
- Material options for a diverse range of application requirements:
 - High-density linear polyethylene (HDLPE) black and natural white color-Complies with FDA Regulation 177.1520 and NSF standard 61.
 - Cross-linked, high-density polyethylene (XLPE) black and natural white color.
 - Opaque white sodium hypochlorite resin #880059 (available on HLT's up to 525 gallons) for outdoor application.
 - Sulfuric acid resin #880046 (available on HLT's up to 525 gallons).
- · Low-profile designs increase safety factors.
- Available in a wide variety of styles, 25 3,400 gallons.
- Horizontal products are available in specific gravities up to 1.9.
- All materials are UV stabilized for long-term outdoor service.

OPEN TOP TANKS SYSTEMS

Mixer Mount Assembly enables a wide variety of mixers to be attached and incorporated into batch tank system service capabilities. (optional)

100% HDLPE Material Construction complies with FDA Regulation 177.1520 and National Sanitation Foundation (NSF) standard 61.

Top Stiffening Ribs provide additional strength to help support top-fitting installations.

Outward Top Tank Flange Design provides optimum rigidity and strength.

Flat and Total Drain Bottom Tank Configurations are designed to interface with respective tank stands.

Fitting Options including welded, bolted or bulkhead types of fittings.

Hinged Lid Design

Superior all plastic hinge provides more reliable service and greater protection from dust and debris. Bolted and sealed lids also available. (optional)

Molded in Gallon and Liter Markers provide permanent gallonage indication for the life of the tank.

Unique Stand Leg Design provides strength and accessibility for forklift handling when tanks are full and empty with appropriate restraint banding. Also can be permanently mounted to the floor for long-term installations.

Heavy-Duty Plastic Stand Design is corrosion proof and available for both flat and total drain bottom tank configurations; stands elevate tanks 12" to 18" off the floor for fitting and piping clearance. (optional)

Minimize waste and improve tank cleanout efficiencies with Snyder's total drain bottom tank designs. Total drainage can be achieved through both

welded fitting (open top only) and mechanically fastened bottom fitting arrangements.

CONE BOTTOM TANKS

- Available in 15, 30, 45 and 60-degree slopes, sizes range from 15-13,000 gallons.
- Material options for a diverse range of application requirements.
 - High-density linear polyethylene (HDLPE) black and natural white color - Complies with FDA Regulation 177.1520 and NSF standard 61.
- Cross-linked, high-density polyethylene (XLPE) black and natural white color.
- Available with cable restraint system that meets
 150 mph wind load and IBC seismic requirements.
- Specific gravity ratings are based on the industry's most severe calculation.
- Standard specific gravity choices are 1.5 and 1.9, other ratings are available upon request. Maximum operating temperature is 100° F.
- All materials are UV stabilized for long-term outdoor service.

*Tank comes complete with poly stand only.

Smaller cone bottom tanks are ideal for small mix or batch applications.

Large cone bottom tanks ranging in sizes from 2,500 to 13,000 gallons, are used to store and deliver up to 10,000 cubic ft. of bulk resins at a processing plant.

TANK FITTINGS & ACCESSORIES

Ladders & Seismic Restraint Systems OSHA compliant ladders are available with and without cages in fiberglass and steel construction. Cable restraint systems are available that meet 150 mph wind load and IBC seismic requirements.

Variety of Manways

A wide variety of manways are available from 8" to 24" size in threaded vented styles, 12" to 24" in hinged styles, and 14" to 24" in bolted and sealed "vapor tight" styles.

Liquid Level Assemblies

Liquid levels can be monitored more closely with external sight gauges and ultrasonic level sensors.

applications.

18" Polyethylene Mushroom Vent

A uniquely designed flexible tank connection that allows a tank's sidewall to move freely, substantially reducing stress at fitting locations resulting in longer, trouble free tank installations

Ideal for venting in pneumatic fill

Insulation and Heat Tracing

A heating element and thermostat can be installed to allow regulation of temperature. In temperature sensitive applications, Snyder tanks can be insulated with rigid urethane foam. The insulation carries an R-16 rating and has a chemical and weather resistant acrylic latex mastic coating.

Threaded Bulkhead Fittings Economical and easy to use, bulkhead fittings can be useful for top dome connections and sidewall connections and on smaller tanks. Available in PVC, CPVC, PP, and PE.

Double Flanged Fittings with PE Encapsulated Bolts Increase corrosion resistance without jeopardizing bolted fitting strength by utilizing Snyder's encapsulated bolted fittings which ensure no metals come in contact with interior liquids. Available with PVC, CPVC, or PP flanges and with 316 SS, Titanium or Hastelloy encapsulated bolts.

Sii Stainless Steel Bolted Fittings For maximum sealing power and fitting strength, Snyder specially cast, 316 stainless steel fitting to provide long-term durability and leak resistance.

FLEXMASTER™

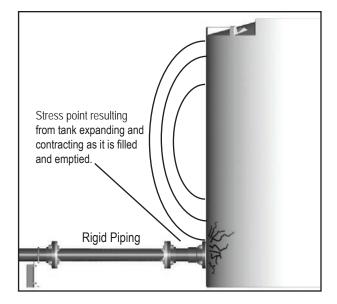

Patent 7,195,284

In recent years, a variety of expansion joint products have been utilized to help alleviate the stress generated at the tank and piping interface points. While some of these products can be an expensive alternative in steel tank installations, none provide the degree of expansion required in a plastic tank, which is why Snyder engineering has been compelled to develop a solution to this age-old problem.

The Flexmaster™ is a uniquely designed flexible tank connection that allows a tank's sidewall to move freely, which substantially reduces stress at fitting locations, resulting in longer, trouble free tank installations.

FLEXMASTER				
Part No.	Description			
5390100N95401	2" Flange Connector Assembly - HDLPE			
5390100N99601	2" Flange Connector Assembly - XLPE			
5390000N95401	3" Flange Connector Assembly - HDLPE			
5390000N99601	3" Flange Connector Assembly - XLPE			

It's a well known fact within the tank manufacturing industry that the majority of all tank failures occur at a fitting location. This is because, the rigidity of a tank's plumbing connection apparatus typically does not allow the tank sidewall to expand and contract adequately, which creates a stress point that ultimately becomes the cause of failure at some stage within a tanks useful life.

Bottom Line, Flexmaster will increase the useful life of your company's tanks while reducing the risk of premature tank failures, which will ultimately result in more profits.

Flexmaster is constructed of the same polyethylene resin as the tank, which guarantees superior chemical resistance at a lower cost than traditional expansion joints.

SUMOTM

Snyder Industries' unique molded drain fitting, the SUMO™, has been developed from knowledge accumulated from over 50 years of rotationally molding polyethylene tanks. The SUMO™ was designed to help ensure maximum liquid drainage from vertical bulk storage tanks.

The Sumo's™ encapsulated ring allows for modification free attachment to two, three, four, and six inch ANSI pipe sizes, and can be located at 90 degree locations around the base of most of our tanks.

Snyder is able to encapsulate either a stainless steel, hastelloy, or titanium insert into the wall of the tank. This encapsulated ring is then sealed off from the liquid contents of the tank by the two O-rings that are installed on a specially machined male adapter.

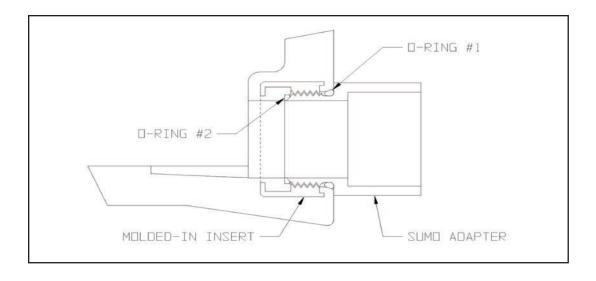

The SUMO™ provides a metal reinforcement completely isolated from any chemical attack.

Maximum tank drainage results from the SUMO™ being molded at the knuckle radius of the tank.

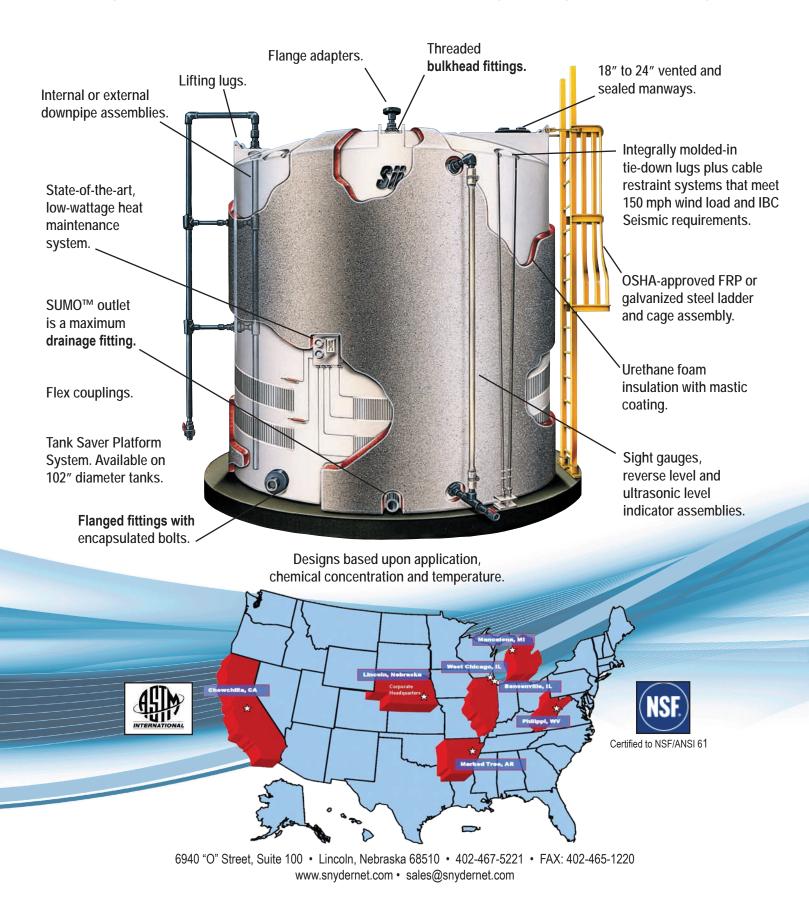

Maximum Drainage: Using standard bulkhead fittings as outlets for vertical storage tanks can leave as much as 9" of liquid in the bottom of the tank. This means the tank is keeping your product, and your money. The SUMO ^{τM} provides maximum drainage so the product gets to your customer. It also helps reduce unscheduled maintenance downtime due to build up of sediment.

Ease of Installation: Because SUMO™ is molded into the tank, pipe and fitting assembly is also easier with no secondary siphon tube assembly required.

Longer Tank Life: With other polyethylene tank "full drainage" outlets, additional flange connections are required. With the SUMO™ you eliminate this cost by piping directly into it. A molded-in outlet also reduces the stress on the tank caused by cutting and bolting. This means you'll save even more money since your tank will last longer. More importantly, you avoid having resin that is not fully cured in the area of the tank that is most stressed. And, if the SUMO™ adaptor is damaged for any reason, it can be replaced. This further extends your tank life.
